

Action is Needed to Slow the Spread of Invasive Plants!

Canadian Coalition for Invasive Plant Regulation

Canada needs a nationally coordinated plan to reduce the spread of invasive plant species. Our current legislative framework is out-of-date and fragmented.

Please join the Canadian Coalition of Invasive Plant Regulation (CCIPR) in seeking change.

Our objectives

- Effective pre- and post-border invasive species risk assessments,
- Bans on the sale and movement of high-risk invasive plant species,
- Labelling to identify and educate the public about lower-risk invasive plants,
- A verifiable industry-wide Code of Conduct, and
- Public education including alternatives to invasive plants.

Multiflora rose amplifies the prevalence of ticks

Datura poisonous

Hogweed causes contact dermatitis

Certain plants, like Parrot's feather can increase disease risk from mosquitos
